

Calibration Service: Now ISO/IEC 17025 Accredited

(Mississauga, ON.) Thermo-Kinetics Company Limited is pleased to announce its ISO/IEC 17025 accreditation for the calibration services offered by its Calibration and Repair Service Division, located at the company's head office in Mississauga, ON, Canada.

Thermo-Kinetics has been performing calibrations of temperature sensors and infrared thermometers for almost 40 years and has been ISO 9001:2000 certified since 1996. With this new 17025 Accreditation, Thermo-Kinetics is demonstrating a significant commitment to this important service as outlined by company V.P. Jeff Dello.

“Accredited labs have been evaluated for their proficiency, staff training, calibration procedures, scientific methodology and more. Achieving this level of accreditation and the inherent costs and benefits associated with it, both now and in the years ahead, reflect our commitment to our customers. At a time when we hear of so many cut-backs to customer services in North America, I am pleased to be taking such a progressive step forward,” Dello summarized.

With offices in Toronto (Mississauga), Montreal, Quebec City, Calgary, Edmonton and Vancouver, Thermo-Kinetics is a leading manufacturer and distributor in the area of process measurement and control.
